

POWER POWER TO YOU

At Cub Cadet, when we talk about power, we don't just mean energy and performance. Not just strength and solidity.

We mean that we push ourselves to perform our best for our customers every single day. This begins with the initial idea, then continues with the development, the design and the manufacture of our products and does not stop with customer service.

That's because our goal is to satisfy you, our customer, with everything we do, with each and every Cub Cadet product. So that you can do your gardening work effortlessly and with pleasure – and be proud of the best results.

THE CUB CADET PRODUCT HIGHLIGHTS FOR 2019

GREAT POWER – IMPRESSIVE REACH

Last year, we were delighted with new product lines that made an immediate impact on the market: XM lawnmowers and XR robotic mowers. Building on this success, Cub Cadet is expanding these model ranges for 2019. The XM3 ER53 will be the new flagship model of the series. It raises the bar for top lawnmowers in terms of both power and performance. Then there's the XR1 500 robotic mower, which is our entry model in the automated mowing category. It demonstrates that performance can be combined with low price. The third new product is the LC2 BP6, a power lawn edge cutter that achieves clean edges – fast and precisely.

BEST RESULTS
MAXIMUM EFFICIENCY
SOLID CONSTRUCTION

www.cubcadet.eu

www.youtube.com/CubCadetEurope

The Cub Cadet XR1 500 is the ideal entry-level robotic mower. With its powerful 100 Watt engine, robust design featuring metal sliding surfaces and steel blades as well as the floating mulching deck, it packs a punch that stands out from the crowd of entry-level robots.

THE CUB CADET PRODUCT SERIES FOR 2019

DIRECTED TO MORE POWER.

THE CUB CADET PRODUCT CATEGORIES

Cub Cadet is continually improving its products to meet the special requirements of new users, experienced users, and pros. While our FORCE models are ideal for beginners, the ENDURO range fits the bill for experienced users and the PRO series is just the ticket for the professionals. So, these categories help both dealers and users to find the perfect product for their needs.

FORCE SERIES

WALKS

Lawn mowers are perfect for smaller and winding lawns. Wheel driven models are easier to use than those propelled by muscle power alone.

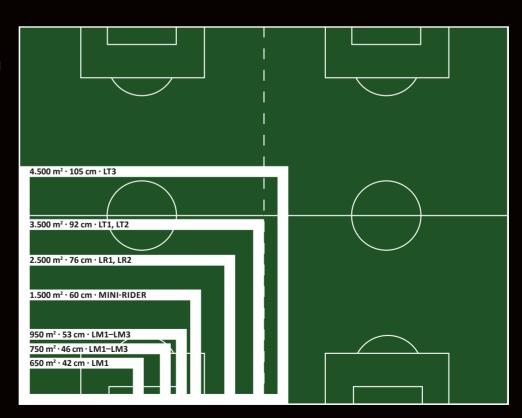

MINI-RIDER

These models ease the strain of mowing large areas with narrow passages. Functioning in either forward or reverse mode, these machines save precious work time by eliminating the need to turn to keep mowing.

TRACTOR

The most powerful variant of the FORCE SERIES makes even large and sloping lawns a breeze, thanks to a large cutting width and a powerful engine.

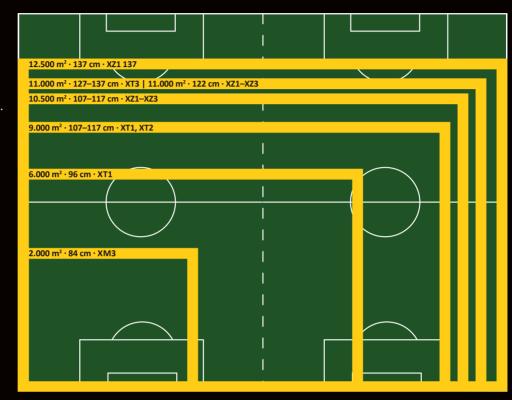

ENDURO SERIES™

WALKS

The XM mower are particularly powerful lawn mower with an extra-wide cutting width up to 84 cm – ideal for large areas of up to 2.000 m².

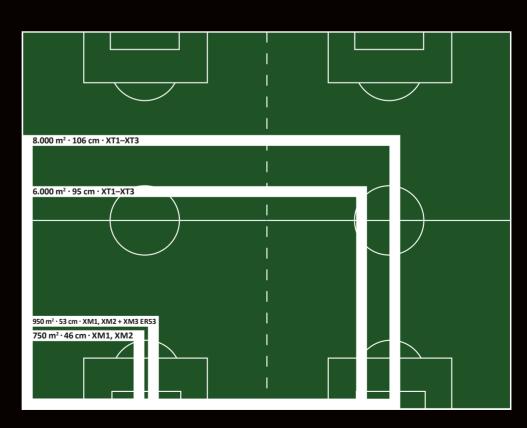

TRACTOR

Our XT models are designed to make short work of the toughest challenges, such as very hilly terrain, steep slopes and high grass. A best-in-class cutting, collecting and mulching system ensures perfect results in minimal time. Those after the tightest of turning circles should look no further than the XT2 models.

ZERO-TURN

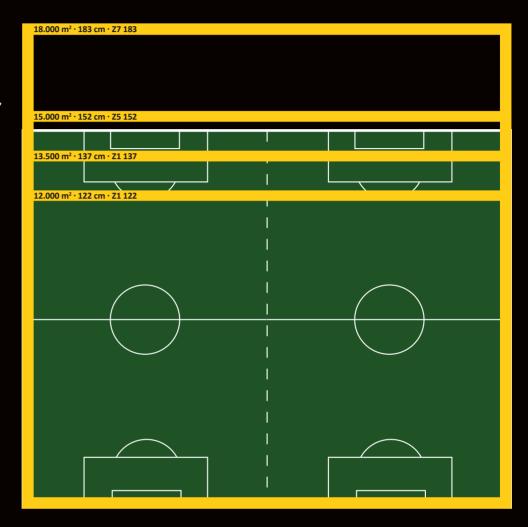

The Zero-Turn models come into their own on park-like lawns and landscapes. Negotiate obstacles easily and mow entire areas comfortably and efficiently with our unique Zero-Turn technology.

PRO SERIES

ZERO-TURN

The PRO SERIES models are the superstars of mowing! They always provide professional-quality cutting results, even on large lawns. And when it comes to speed, efficiency and comfort, they achieve outstanding results. The choice of the pros!

This cutting-width based performance can be achieved in one hour of mowing and under optimum conditions. Other factors also affect the actual area performance: The lawn condition (height, density, humidity) and the area (hilly, sloping, shape, obstacles such as trees, ponds etc.), working speed and basket size. We recommend you use more powerful models for sloped or hilly lawns and those with extra-small turning circles for negotiating narrower passages.

FIND YOUR CUB CADET MODEL

Did you know that the cutting width of your lawn mower (cutting deck width) is the key factor dictating mowing time? The greater the cutting width, the faster you're done!

THE GRAPHICS WILL HELP YOU SELECT THE WIDTH.

The diagrams illustrate the area output per hour based on a standard German soccer field – 68 m wide, 105 m long, for a total of 7.140 m².

FOR EXAMPLE:

A cutting width of 42 cm means you can mow a 600 m² lawn in about an hour.

In other words, with a cutting width of 53 cm, you can mow a 600 m² lawn in as little as 40 minutes!

FORCE SERIES FOR NOVICES

Ideal for those with large gardens, requiring more powerful and durable mowers. They seek a top-class entry-level machine, with the power and performance needed to meet the increased demands imposed.

In short: the FORCE SERIES models.

ENDURO SERIES FOR EXPERTS

Ideal for ambitious gardeners with landscaped gardens. With all the long-term experience and now ready to "move up a level". More powerful and higher-performing mowers for faster and better work. Nothing but the best machines fit the bill. In short: the ENDURO SERIES.

PRO SERIES FOR PROS

True pros – namely landscape gardeners, tasked daily with keeping large parks and public green spaces pristine – look no further than these machines. Crucial for them are top performance, 101 % reliability and optimal efficiency in use. Which is why they need professional products, capable of withstanding tough and continuous use. In short: the PRO SERIES.

3-11-1 OPTION

REAR DISCHARGER, COLLECTING & OPTIONAL MULCHING

To change your lawn mower from discharging mode to mulching, simply engage the optionally available mulching wedge.

LM SERIES - PERFECT CUT AND BAGGING

High efficiency alongside typical Cub Cadet quality – this is where Cub Cadet lawn mowers come into their own. A durable construction extends the service life, while the Cub Cadet OHV engine delivers the right power to meet your needs. The Cub Cadet LM Series gives you the choice between bagging and discharging the clippings. A mulch kit is also available as an accessory, giving you the option of mulching your lawn. Many ergonomic features help get the job done while reducing stress – the easy-empty grass catcher, the ergonomically formed handlebar, the convenient central height adjustment and the ball bearing wheels all help enhance the comfort even more.

Rear-wheel drive

12A-LQSJ603

Cutting height adjustment: 6 positions/centra

LARGE GRASS CATCHER

A large grass catcher reduces the number of dump runs. Saving you time – fewer trips to/from the compost heap.

CENTRAL CUTTING HEIGHT ADJUSTMENT

Comfortably change the cutting height centrally with one lever – choose from 6 different positions.

ERGONOMIC HANDLEBAR

The ergonomic handlebar is height adjustable and fully foldable, making it easy to store the mower.

SELF-PROPELLED

Self-propelled mowers make mowing even sloping and expansive terrain a breeze. Varispeed models can adapt to your personal pace.

THE 4TH AND 5TH LETTER IN THE MOWER NAME

Cub Cadet products are named to showcase their technical information and details.

The 4th letter of the product name always indicates the engine displacement. For walks the letters stand for:

The 5th letter shows whether it's a push mower or self-propelled via rear- or front-wheel drive:

P = push mower

F = front-wheel drive

R = rear-wheel drive

Additional lower-case letters signal further special product features and benefits, e.g.:

e = electric starter

s = MySpeed

CLEVER AND ENVIRONMENTALLY FRIENDLY

Looking for perfectly mowed and groomed lawns? Try a mulching mower (LM1 DF53) – mulching optimizes the nutrient cycle of the lawn. The grass is cut several times, equally distributed over the ground where it decomposes and can then be used as natural green fertilizer. This saves a lot of fertilizer – friendlier to the environment and to your wallet! Mulching mowers also eliminate the need to collect and dispose of grass clippings. No more interrupting work to empty the grass catcher. Saving you more time.

MOW AT YOUR OWN PACE

Our LM models with adjustable drive control feature an intuitive handle system that moves the mower at a speed to suit your pace. Simply grab the handle with both hands and start walking. The handle then tilts forward automatically and the mower gets to work. The quicker you walk, the more the handle tilts and the faster the mower advances. As soon as you stop, the handle tilts backwards and the mower stops automatically. A simpler and easier way to get your lawn into shape!

THE MYSPEED DRIVE SYSTEM

The wheel drive is automatically switched on as soon as you push the handle forward. The speed automatically adjusts to your walking speed.

THE MYSPEED EVO DRIVE SYSTEM

MySpeed EVO lets you configure the maximum speed step-by-step using detents to adjust the mower speed to the terrain. For example, when you need to limit the maximum speed in angled areas and flower beds for maximum maneu-verability. For long straights, however, faster mowing makes sense (only with XM2 DR46s).

Cub Cadet

Electric start gives you maximum comfort. Start your lawn mower at the turn of a key.

HEIGHT-ADJUSTABLE-HANDLE

Adapt the ergonomic handlebar to your height of choice, for comfortable mowing free of stress and fatigue.

CENTRAL CUTTING HEIGHT ADJUSTMENT

One grip to adjust all four wheels simultaneously. Less effort and time taken, matchless comfort.

LARGE GRASS CATCHER

A large grass catcher reduces the number of dump runs. Saving you time – fewer trips to/from the compost heap.

20 / LAWN MOWERS

3-11-1

REAR DISCHARGER, COLLECTING & MULCHING

Select the right mowing method for your Cub Cadet lawn mower with a simple flick of the wrist. Whether collecting clippings, discharging them from the rear or mulching – all options are easily selectable on this mower.

LM2 SERIES - POWERFUL AND COMFORTABLE

Our LM2 series mowers come with powerful Cub Cadet engines and many comfort features. First and foremost, there's the MySpeed wheel drive, which makes mowing incredibly comfortable and flexible. Simply walk at your own pace, and the LM2 series mower will follow your lead.

4-11-1

REAR BAGGING, MULCHING, SIDE & REAR DISCHARGE

4-in-1 gives you optimal mower flexibility with four usage modes. You can attach a side deflector to the deck and turn the unit into a side-discharging mower. You can operate it as a rear-discharger or attach a collecting bag — or use the mulching option as the fourth operation option. Giving you freedom to select the ideal discharge solution, whatever the condition.

HIGH REAR WHEELS

High rear wheels to negotiate potholes and uneven lawns effortlessly. For ultra-comfortable handling and smooth driving.

FRONT CASTER WHEELS

The caster wheels of this mower give you optimal maneuverability.

A HARD-TOP BAG WITH A FILL INDICATOR

The dustproof hard-top catcher with fill indicator means less dust during dry periods, while the fill indicator flap indicates when the grass catcher is full and needs emptying.

VARIOSPEED CONTROL

Six speeds let you adjust your pace to every setting: slower on tighter curves; faster for larger areas.

TECHNOLOGY

A specially developed geometry inside the mower housing ensures all cuttings are transported through a **turbo tunnel** into the grass catcher. Improving mowing performance of the XM series because no more cuttings get stuck or left on the lawn.

UNDERPINNING THE VERY BEST RESULTS

The Cub Cadet XM1 raises the bar higher in lawn mower performance. Packed with must-have features, this series guarantees the best in mowing results.

SPECIAL ADVANTAGES OF THE XM:

FAST CLEANING

The mower stands firmly when turned over for easy access to the blades and mowing deck. The integrated mowing deck washing nozzle cleans the housing.

AVS ANTI-VIBRATION SYSTEM

Super-low vibration thanks to the axle with special shock absorbers and an anti-vibration ring between the mowing deck and engine.

POWERFUL CUB CADET ENGINE

Delivers the power needed for easier and faster mowing. Ultradurable engines offer unrivalled performance, especially on long grass.

Cub Cadet

THE BEST CUB CADET MOWERS ON THE MARKET

-3T- Cub Cadet. TECHNOLOGY

A DISCHARGE CHUTE FOR EXCELLENT GRASS COLLECTION

- Mower housing with specially designed geometry
- Cuttings are transported completely to the grass catcher
- Improved mowing performance

• Manual (XM1 DP46)

• Single Speed (XM1 DR46, XM1 ER53)

 VarioSpeed – 6 speeds, perfect for any setting. (XM2 ER53, XM2 DR46, XM2 ER53e)

 MySpeed EVO – automatically adjusts to your walking speed.
 The maximum speed can be preset using a range of detents.

 Variable drive – Stepless speed via controller (XM3 ER53)

(XM2 DR46s)

AVS ANTI-VIBRATION SYSTEMSpecial axle dampers above the deck absorb vibrations from the engine.

32 / LAWN MOWERS

- **GRASS CATCHER** (65/75/80 LITRES) WITH FILL **INDICATOR & DUST COVER**
- **EASILY ADJUSTABLE BAR HEIGHT**
- **COMFORTABLE CENTRAL** 6-STEP CUTTING HEIGHT **ADJUSTMENT**
- **5** HANDLE FEATURING MARKET-**LEADING ERGONOMIC DESIGN -**MINIMAL EFFORT REQUIRED
- **6** ELECTRIC START AT THE TOUCH OF A BUTTON (XM2 ER 53E)
- STANDARD:
 REAR DISCHARG-**ER, COLLECTING AND MULCHING**

POWERFUL ENGINES WITH LARGE DISPLACEMENT

Cub Cadet, ENGINES all XM1 mowers come One XM2 mower and

complete with powerful Cub Cadet engines (159 and 196 ccm respectively) that extend the service life and perform outstandingly, particularly on tall grass.

ROBUST DESIGN AND HIGH-QUALITY COMPONENTS

The single die-cast housing is extremely robust: there are no screws that can come loose. Tough front and side bumpers protect the mower from obstacles.

FAST CLEANING

An integrated mowing deck washing nozzle and a special cleaning position mean raising, rinsing and cleaning the body couldn't be easier.

TOP-QUALITY WHEELS, EACH WITH DOUBLE BALL BEARINGS

ULTRA-ROBUST WHEELS FOR OPTIMAL RUNNING PERFOR-MANCE AND DURABILITY

VARIOSPEED

XM ENDURO SERIES lawn mowers with VarioSpeed offer a wheel drive with six speed steps. So the speed adjusts perfectly to any situation.

The XM2 DR46s automatically adjusts to your walking speed. The maximum speed can be preset using a range of detents.

EVERYTHING A POWER MOWER NEEDS

The Cub Cadet XM2 lawn mower offers you the best of all worlds. Thanks also to the two available wheel drives – VarioSpeed and MySpeed EVO – which make all the difference.

XM2 - SPECIAL ADVANTAGES:

POWERFUL ENGINES WITH LARGE ENGINE DISPLACEMENT

Sufficient power all the time for fast and efficient working, thanks to the powerful Cub Cadet engine or the smoothly Honda engines.

ELECTRIC STARTER

The XM2 ER53e engine starts easily at a push of a button.

THE TOP MODEL FOR EFFICIENT MOWING

The Cub Cadet XM3 delivers everything you expect from a top model: exceptional mowing performance, high efficiency, easy handling and a professional appearance. It comes with a powerful Kawasaki engine that gets more output than you'd expect from every cubic cm of engine displacement. That's what gives the XM3 such a high performance. And then there is the blade-brake clutch, which allows the engine to keep running even when the mowing deck is switched off, so you don't have to restart. So, the XM3 is ideal for professional use and makes short work of even large lawns.

BLADE-BRAKE CLUTCH (BBC)

This feature can be used to keep the engine running with the mowing deck switched off. This provides safety when emptying the grass catcher and saves time because there's no need to restart the engine.

HEAVY DUTY TRANSMISSION Transmission with aluminium housing for durability.

STEEL RIMS

Steel rims supported by ball bearings improve the running quality and give a higher stability.

POWERFUL ENGINE

Professional Kawasaki FJ 180 V Kai engine with high torque of up to 10. It is equipped with a pressure lubrication system, enabling the user to negotiate slopes of up to 30°.

XM3 - SPECIAL ADVANTAGES:

HIGH-PERFORMANCE ENGINE

The reliable B&S OHV E-Start engine provides enough power even for long grass and on inclines.

LARGE PETROL TANK
WITH A CAPACITY OF 7,5 L

Longer mowing times due to less fuel consumption.

ELECTRIC STARTER

Starts the engine comfortably at the turn of a key.

ZERO TURNING CIRCLE

Swiveling front wheels and pneumatic rear wheels.

CENTRAL CUTTING HEIGHT SETTING

The cutting height is easy to set in 8 stages from 25–100 mm with a single lever.

STRONG FEATURES, EASY OPERATION

Due to its large cutting width and powerful engine, the Cub Cadet large-area mower allows you to mow a large area in a short time. The combination of strength and efficiency will make your work easier.

4,9 LITRE FUEL TANKThe large fuel tank with fuel indicator gives you the freedom to mow your lawn in a full cycle – no refuel

needed.

200 LITRE GRASS CATCHER

A 200 litre grass catcher bag (models LR1 MR76 and LR2 NR76) with dust protection cover, two grips and fill indicator. Can be emptied from the driver's seat.

LARGE TYRES

Lawn-friendly, yet handy, even on uneven terrain.

STEP-THROUGH FRAME

With soft rubber foot pads, for easy access and comfortable foot rest.

CUTTING HEIGHT ADJUSTMENT & PTO CLUTCH

Easily adjustable cutting height over 5 positions, from 38 to 95 mm. Both levers are located ergonomically on the right side of the seat.

COMPACT AND VERSATILE LIKE NEVER BEFORE

Modern design, versatility and comfortable mowing – just three of the many reasons to go for the Cub Cadet MINI-RIDER. The compact and manoeuvrable Cub Cadet MINI-RIDER models with electric start are equipped with one of the powerful and low-maintenance Cub Cadet engines.

If you want to collect, discharge or mulch your grass clippings, this is your go-to mower. Thanks to their space-saving design, these Cub Cadet MINI-RIDER models are almost as compact as a conventional walk behind mower in terms of garage space.

TRANSMATIC TRANSMISSION

The transmatic transmission allows shift-on-the-go speed control. Simply choose your driving direction, set the desired basic speed and start mowing. On the Cub Cadet MINI-RIDER LR1 MR76, select between 6 forward and 6 reverse speeds.

76 CM MOWING DECK

Selectable collecting, mulching and discharge options come as standard with model LR1 MR76. The model LR1 MS76 offers mulching and side discharge options. Superior mulching, excellent collection and side discharge for spreading. Whatever you choose, the MINI-RIDER can handle it.

The German garden magazine "Familienheim and Garten" awarded the MINI-RIDER LR1 MR76 a "good" verdict in testing.

The unit shone in terms of performance and versatility in particular. The electric start and a large fuel tank of approx. 5 litres allow mowing for extended periods without having to refuel.

INTELLIGENT PARKING ASSISTANCE (IPA)

The brand new IPA system makes parking your LR2 in your garage or summer house a breeze. The intelligent system halves the speed of your MINI-RIDER, for reversing more safely and precisely.

REVTEK™ TECHNOLOGY

RevTEK[™] – Reverse Mowing Technology: Mowing in reverse, when no kids or animals are around. Ensuring greater safety (except the LR2 FR60).

HYDROSTATIC DRIVE SYSTEM

The LR2 comes complete with a top-quality hydrostatic drive system. With the parking brake on the left and a one-pedal foot control on the right.

LIGHTS

LED lights for safer operation at dawn (except the LR1 MR76, LR1 MS76 and LR2 FR60).

SUPER GRIP PEDALS

Under challenging conditions, the super grip pedals provide maximum grip for safe driving.

TELESCOPIC STEERING COLUMN

With a soft grip steering wheel for maximum comfort. The steering shaft is height-adjustable to suit operators of any height (except the LR2 FR60).

FORCE SERIES

CENTRAL REAR DISCHARGE

All our rear discharge tractors are designed to transport grass clippings into the grass catcher with optimal efficiency. All LT Series rear discharge models feature a grass catcher made of durable fabric for flexibility and have an air passage to guarantee air flow and perfect collection. The hard top controls dust and reduces noise. The telescopic handle allows you to empty the grass catcher right from the driver's seat.

PRECISE STEERING SYSTEM

All Cub Cadet lawn tractors help redefine your notion of comfort. We improved the steering of the lawn tractors. Our precision gear-steering technology supports operators at work and makes your powerful lawn tractor even more efficient and surprisingly easy to manoeuvre.

THE VARIOUS AVAILABLE DRIVE SYSTEMS

TRANSMATIC TRANSMISSION

Allows shift-on-the-go speed control. Simply choose the driving direction, set the desired basic speed with the speed shift lever on the dashboard and release the brake/clutch pedal. Push the pedal to slow down or press it all the way forward to stop. Releasing the brake pedal automatically brings the tractor back to a preset speed.

HYDROSTATIC TRANSMISSION

Impresses with its modern technology. It features a self-lubricating hydro pump for minimum maintenance and maximum durability. The hydrostatic transmission also stands out for its velocity control as well as continual forward and reverse speeds. No clutching or shifting required. You can drive with millimeter accuracy, and very gently. The XT Series lawn tractors are foot-pedal controlled. The LT Series tractors are controlled by either a hand lever (side discharger tractors) or a foot pedal (rear discharger tractors).

COMFORTABLE SEAT WITH HIGH BACKREST FOR ALL LT MODELS

Mow frequently? For many hours? Then you know how important it is to sit comfortably. The high backrest supports an upright posture, making it far more comfortable.

COMFORT STEERING WHEEL A 3-spoke soft grip steering wheel is standard on all our tractors.

CUTTING HEIGHTADJUSTMENT

5-position height adjustment to easily change the cutting height (30–95 mm).

FORCE SERIES

ENJOYABLE EXPERIENCE

Cub Cadet LT Series lawn tractors are extraordinarily versatile. They excel when it comes to covering large areas quickly thanks to the oversized grass catcher – and even more with side discharge, eliminating the need to stop and empty the catcher. Thanks to the user-friendly cutting height adjustment, the LT Series achieves optimum cutting results – even on difficult ground.

STEEL FRAME

All tractor frames are made of fully welded and powder-coated rugged steel.

FLOATING STEEL OR CAST IRON FRONT AXLE

Keeping all four wheels on the ground, however uneven the surface.

PIVOTING ONE-PIECE HOOD

The entire engine hood can be folded up within seconds without tools, for easy maintenance.

ENDURO SERIES

"I WAITED A LONG TIME BEFORE BUYING A LAWN TRACTOR. NOW IT'S TIME. THIS TRACTOR IS AN UNBEATABLE VALUE!"

GUNNAR A.
RHINELAND-PALATINATE

"BIG GARDEN. BIG MOWER.
AT LITTLE COST. THE 25% FUEL SAVING/
WAS WHAT CLINCHED IT FOR ME."

SVEN G. SCHLESWIG-HOLSTEIN

THE TOP5 OF THE FEATURES!

POWER LIKE NEVER BEFORE!

1. MARKET-LEADING CUTTING, COLLECTING & MULCHING SYSTEM

Optimize your mowing results in minimum time.

2. THE SMALLEST TURNING CIRCLE ON THE MARKET

Unbeatable efficiency even in confined spaces thanks to innovative TIGHT TURN Technology.

3. ULTRA-STURDY, CORROSION-RESISTANT FRAME

Ultra-rigid frame for top durability.

4. PERFECTLY MATCHED TRANSMISSION AND ENGINE POWER

Optimal drive power and the strongest engine in its class.

5. ULTRA-RELIABLE V-BELT DESIGN

Thanks to reduced fan belt tension and ingenious, perfect fan belt guidance without twisted fan belts, the Cub Cadet mowing deck operates with impressive stability and endurance.

The XT2 PS117i and XT3 QS137 tractors are also equipped with a welded mowing deck, which is even sturdier and more durable (see photo on the right).

CUB CADET APP -THE SMART WAY TO STAY IN THE PICTURE

Want to know when the next oil change is due, when the blades need to be replaced, or how many operating hours your XT lawn tractor has clocked up? Simply download the Cub Connect Bluetooth® App from the App Store/Play Store. Then use your smartphone to view the operating state and any maintenance information about your Cub Cadet XT2 or XT3 lawn tractor. You can even charge your phone while mowing using the multifunction socket.

MANUAL

Direct online access to the manual for your XT lawn tractor.

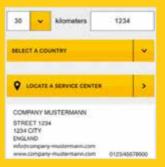

OPERATING HOUR COUNTER

The operating hour counter tells you how many hours your XT lawn tractor has worked.

MAINTENANCE SCHEDULES

Various maintenance schedules inform you how many operating hours remain until the oil, air filter and blades need changing. You can also read off the battery charge status here.

OIL

SPECIALIST WORKSHOPS

Find out here where your nearest Cub Cadet specialist workshop is and how to get there fastest.

MAINTENANCE RECORDS

THE CUB CADET EFI ENGINE – DESIGNED FOR TOP EFFICIENCY

A WHOLE HOST OF BENEFITS

- Up to 25 % less fuel consumption compared with a carburettor engine with comparable power.
 This saves practically every 4th tank filling.
- Large engine displacement for miles of mowing power: 679 cm³.
- Engine no longer requires a manual choke. Simply take a seat, push the start button and get mowing.
- Improved driving characteristics (cold running performance, power consumption, no afterburning or continued running).
- Less servicing required and reduced likelihood of warranty claims thanks to direct fuel injection. No carburetor to drain, so you save on maintenance.
- Eco-friendly due to reduced emissions, fewer visible fumes.

Simple troubleshooting and diagnostic system for direct fuel injection lets dealers service models faster.

THE FOLLOWING XT MODELS FEATURE THE CUB CADET EFI ENGINE: XT2 PR106ie, XT2 PS117i

OTHER IMPORTANT CHARACTERISTICS THAT MAKE MOWING EASIER

The lawn tractors in the XT ENDURO SERIES offer numerous performance features, all targeting the same goal: making mowing as fast and easy as possible. The 2018 models offer an enhanced range of features: now including a cutting height memory cursor which displays your most frequently used and/or favorite cutting heights. A battery compartment also helps improve installation and maintenance.

GRASS CATCHER WITH ELECTRONIC EMPTYING

At the touch of a button, the grass catcher lifts up and tips the cuttings out. Effortless, even when the catcher is full. Universal accessories for all XT models retrofittable from 2018.

POWERFUL BATTERY

Much longer service life ensures longer performance. Wet-cell battery with 22 Ah – no more acid filling required.

POWERFUL KAWASAKI V-TWIN ENGINE

A two-cylinder engine for challenging terrain. Ultra-smooth running with low fuel consumption.

XT MODELS WITH KAWASAKI V-TWIN ENGINES:

XT2 PR95, XT2 QR106, XT2 PS107, XT2 PS117, XT3 QS127, XT3 QS137, XT3 QR95, XT3 QR106e

OUR BEST TRACTORS EVER

You expect lawn tractors to be strong, durable and to excel in performance. We now raise the bar even higher. With the Cub Cadet models from the XT ENDURO SERIES, experience the strongest lawn tractors ever seen on the market.

LAWN TRACTORS

THE XT ENDURO SERIES AT A GLANCE

A MARKET-LEADING CUTTING, COLLECTING AND MULCHING SYSTEM

- Thanks to the all-new grass cuttings transport system and the rear-discharge mowing decks.
- With twice the grass-catching of previous Cub Cadet lawn tractors.
- Best side discharge grass catcher on the market.
- Push-button switch-on.

320 LITRE GRASS CATCHER

360 LITRE GRASS CATCHER

HYDROSTATIC V-BELT

HYDROSTATIC POWER TRANSMISSION

Jerk-free drive system – simply press the pedal and drive

POWERFUL CUB CADET ENGINE

high performance and reliable – developed in the USA (XT1 OS96, XT1 OS107, XT1 OR95, XT1 OR106)

EFFICIENT CUB CADET EFI V-TWIN ENGINE

2-cylinder engine produced in house (XT2 PR106ie, XT2 PS117i)

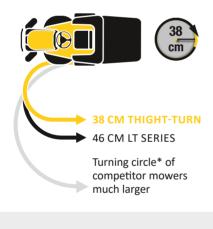

KAWASAKI V-TWIN ENGINE

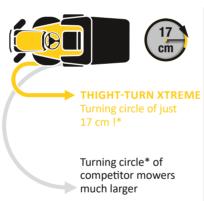

(XT2 PR95, XT2 QR106, XT2 PS107, XT2 PS117)

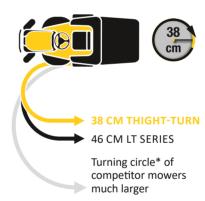

KAWASAKI V-TWIN ENGINE

2-cylinder engine for difficult terrain, ultra-smooth running and low fuel consumption (XT3 QS127, XT3 QS137, XT3 QR95, XT3 QR106e)

EASIEST STEERING SYSTEM ON THE MARKET

CUB CONNECT BLUETOOTH® APP

ELECTRIC GRASS CATCHER LIFTER for XT2 PR106ie & XT3 QR106e

START THE ENGINE EASILY AT THE TOUCH OF A BUTTON

SOLID, WELDED MOWING DECK for XT2 PS117i, XT3 QS127 & XT3 QS137

12V MULTI-FUNCTION CHARGING SOCKET; CHARGE BATTERIES AND MOBILE DEVICES WHILE YOU DRIVE

ANTI-DUST GRASS CATCHER SYSTEM AVAILABLE AS AN OPTIONAL EXTRA

KEY START

ANTI-DUST GRASS CATCHER SYSTEM AVAILABLE AS AN OPTIONAL EXTRA

ANTI-DUST SYSTEM

Rear discharge with multi-layer dust apron included in accessories. The apron protects against flying grass and dirt

ALL-GROUND TRACTION SYSTEM

Perfect traction even on heavy ground – thanks to mechanical differential lock

^{*}The turning circle of a lawn tractor involves marking the position of the left rear wheel while the tractor completes a 360-degree circle (on plain ground). Now you measure the distance between the mark and the actual position of the left rear wheel again. Half this distance is the turning circle – included in all product specifications.

ENDURO SERIES™

Selected XT lawn tractors are equipped with a powerful and reliable Cub Cadet engine – developed in the USA.

UNBELIEVABLE POWER & EFFICIENCY

The Cub Cadet XT series, part of the latest generation of garden tractors, sets new standards for power, performance and robust quality – offering you the ultimate power package. XT1 lawn tractors are ideally equipped for mowing, collecting and transporting clippings and can also be expanded with a special range of accessories.

DIAGONAL ADJUSTABLE SEAT Individually adaptable – pure comfort for all users.

PUSH BUTTON
BLADE START
Use the drive only when in use – that's more efficient and safer.

MECHANICALLY SUPPORTED CUTTING HEIGHT ADJUSTMENT

Quickly and easily select the perfect setting.

HYDROSTATIC DRIVE SYSTEM Smooth drive system for precise mowing – simply step on the pedal and go.

THE MOST COMPREHENSIVE RANGE OF ACCESSORIES FOR XT LAWN TRACTORS!

Whether it's transporting work material or cuttings, pushing seeds into the soil, spreading fertiliser, sweeping footpaths or clearing snow – the Cub Cadet XT lawn tractor can do so much more than just mow the lawn. The extensive range of Cub Cadet accessories, the largest range of its kind in Europe, will help to meet all the gardening requirements. This means you can use your XT lawn tractor all year round and it will pay for itself all the more quickly.

LAWN TRACTOR ACCESSORIES

CUB CADET HAULER

Cub Cadet hauler with 450 kg load-bearing capacity

Mod. no.: 19B40026100R Price: -

Handle

Mod. no.: 19A400270EM

Tool holder

0 037049 959082

Mod. no.: 19A400300EM

HIGH LOAD CAPACITY

Rated to carry up to 450 kg with sides set upright and can easily haul soil or mulch, brick or stone, shrubs or plants, or even garbage bins.

REMOVABLE PANELS

Easier access for loading, unloading and dumping.

VERSATILE - LETS YOU DO MORE. **EASY FLAT-BED HAULING**

Increase versatility by operating in fold-flat mode; ideal for longer loads like logs or lumber.

HANDLE AND TOOL HOLDER FOR **CUB CADET HAULER**

- Soft grip handle
- Flexible use
- Swift and simple assembly

CONVENIENT - FOLDS FOR EASY STORAGE. **COLLAPSIBLE SIDES FOR EASY STORAGE**

Collapse all four sides and store it vertically, taking up 70 % less space than traditional yard carts in a garage or shed.

CHARGING PLATFORM FOR XT SERIES SIDE DISCHARGER

- Foldable vertically and lockable in place
- Easy to install thanks to the FastAttach™ System
- Max. weight: 36 kg
- Suitable for XT Series side-dischargers

Price: -

ELECTRIC SPREADER FOR XT SERIES SIDE DISCHARGER

- Easy to install thanks to the FastAttach™ System
- Can be switched on/off from the driver's seat
- Capacity: 45 kg
- Suitable for XT Series side-dischargers

Mod. no.: 19A30028100

CUB CADET TOW BEHIND BROADCAST SPREADER

• Capacity: 87 kg

• Spreading width: 370 cm

Mod. no.: 196-542-000 Price: -

TOW BROADCAST SPREADER

· Capacity: 80 kg • Weight: 26 kg

• Spreading width: up to 365 cm

• Dimensions (L/W/H): 109 / 96,5 / 104 cm

· Capacity: 50 kg

Mod. no.: 196-036-000 Price: -

Mod.-Nr.: 196-545-000

• Capacity: 39 kg

• Weight (approx.): 8 kg

• Spreading width: up to 300 cm

• Dimensions (L/W/H): 67,3 / 67,3 / 36,8 cm

Mod. no.: 196-031B000

CUB CADET TRAILER

• Capacity: 544 kg • Volume: 425 litre

• Dimensions (L/W/H): 175 / 97 / 64 cm

Mod. no.: 196-541-000 Price: -

LAWN TRACTOR COVER L/XL

Size L: for small- and medium-sized lawn tractors

008423 806441 Mod. no.: 2024-U1-0003

Size XL: for large-sized and rear discharge lawn tractors (B)

UTILITY CART WITH POLY BED

Poly convertible push/tow cart, single-axle tipper

• Capacity max.: 159 kg

• Weight: 27 kg

• Dimensions approx. (L/W/H): 142,2 / 83,8 / 76,2 cm

Mod. no.: 190-236A000 Price: -

• Poly convertible push/tow cart, single-axle tipper

• Capacity max.: 175 kg

• Weight: 30 kg

Price: -

UTILITY CARTS WITH STEEL BED

• Tow steel dump cart, single-axle tipper, removable tailgate

• Capacity max.: 159 kg

• Dimensions approx. (L/W/H): 152,4 / 83,8 / 72 cm

• Weight (approx.): 33 kg

• Tow steel dump cart, single-axle tipper, removable tailgate

• Capacity max.: 340 kg

• Dimensions approx. (L/W/H): 177,8 / 83,8 / 73,7 cm

• Weight (approx.): 70 kg

008423 804348

Mod. no.: 196-507-000

CUB CADET TOW BEHIND SWEEPER

Working width: 107 cm

008423 807516 Mod. no.: 190-163A000

• Working width: 112 cm

• Catcher capacity: 736 litre

008423 858976

Mod. no.: 196-543-000

Price: -

Price: -

LAWN ROLLERS

Push/tow poly lawn roller, max. weight 114 kg when filled with water, width 61 cm, diam. 46 cm, dimensions approx. (L/W/H): 127 / 76,2 / 45,6 cm

008423 401264 Mod. no.: 190-228-000 Price: -

Tow poly lawn roller, max. weight 182 kg when filled with water, width 91 cm, diam. 46 cm, dimensions approx. (L/W/H): 127 / 106,7 / 45,7 cm 008423 804478 Mod. no.: 190-229-000

SPRAYERS

Tow sprayer, large, 6,8 I/min, capacity 95 I, dimensions approx. (L/W/H): 139,7 / 66 / 50,8 cm 008423 804430

Mod. no.: 190-537-000 Price: -

AERATORS/DE-THATCHER

Attachable lawn rake, working width 102 cm, 20 tines, variable load, dimensions (L/W/H): 104/101,6/104 cm

008423 804454 Mod. no.: 190-526-000 Price: -

Attachable lawn rake, working width 102 cm, 12 aerator wheels, approx. 23 cm diam., aeration depth up to 6 cm, dimensions (L/W/H): 104/101,6/104 cm, weight 14 kg

008423 875812 Mod. no.: 190-224C000 Price: -

MULCH KITS

Mulch Kit (without blades) for model LT1 NS96 and LT2 NS96

008423 819632 Mod. no.: OEM-190A116

Mulch Kit (without blades) for models LT1 NR92, LT2 NR92 and LT3 PR105

Mod. no.: 196-749A678

Mulch Kit (without blade) for models XT1 OR106, XT2 QR106, XT2 PR106ie and XT3 QR106, mulching plug optional available (196-560-000)

008423 875652 Mod. no.: 196-550-000 Price: -

Mulch Kit (without blade) for models XT1 OR95, XT2 PR95 and XT3 QR95, mulching plug optional available (196-561-000)

Mod. no.: 196-551-000 Price: -

PLENTY OF IMPRESSIVE FEATURES!

The XR ENDURO SERIES robotic mowers include a vast array of features and deliver ultra-efficient performance. As well as making mowing more convenient, they also deliver a uniquely precise and fast cut.

BEST-IN-CLASS

Outperforms other models with a durable and powerful mowing system! Mows up to 10 % faster all-round.

STATE-OF-THE-ART **TECHNOLOGY**

Performance and features to meet professional needs, such as a GSM module, App 2.0, brushless DC engine and multizone mowing.

POWER WHEELS & CUTTING WIDTH

Extra-wide, high-grip wheels for exacting requirements. Mows lawns measuring 500-5.000 m² in top time.

MULTI-ZONE CAPABILITY:

Sub-zones connected to the main zone can be mowed consecutively. For separate zones that are not connected to the main area, a second station or a sensor (RoboZone) is required.

ULTRA-ROBUST HOUSING

Designed to meet the toughest demands.

ENDURO SERIES"

PIN CODE

By entering your own unique PIN, you ensure that no one else can use your XR robotic mower without your permission.

INTEGRATED RAIN SENSOR

If it rains, the XR robotic mower automatically returns to its base and only starts cutting again once the weather improves.

SMARTMOW

Instead of just stopping and turning, shortly before it reaches the perimeter wire, the XR robotic mower turns in a continuously smooth arc, saving time.

PERFECT RIGHT TO THE LAWN EDGE

Seamless agility and unique edge mode for mowing over the wheelbase – for perfect lawn edges.

POWER ENGINES

Its high-performance engines cut lawns quickly and efficiently. The brushless engines (not included in the XR2 1000 and 1500) run almost noiselessly and require minimal maintenance.

APP 2.0

Communicate with the robotic mower via your smartphone and control all its functions (with BLE and GSM compatible).

NEW FEATURES 2019

THE FUTURE OF MOWING TODAY

Cub Cadet is launching a whole raft of innovations in 2019 that set the whole series up for the future. Included here are lots of new digital features that make it even easier to control the various functions of your XR robotic mower. Welcome to the future of lawn care!

ROBOCONNECT

This 2-way module can both receive and send commands. It connects the XR with the APP 2.0 as well as the web portal MyXR for controlling the robotic lawnmower.

MyXR

The MyXR portal informs you about mower use, issues reports, and gives you access to mowing schedules which you can change as required.

APP 2.0

This app lets you control several XR robotic mowers simultaneously. You can also change settings and mowing schedules remotely and access mowing reports. The APP 2.0 is BLE and GSM compatible.

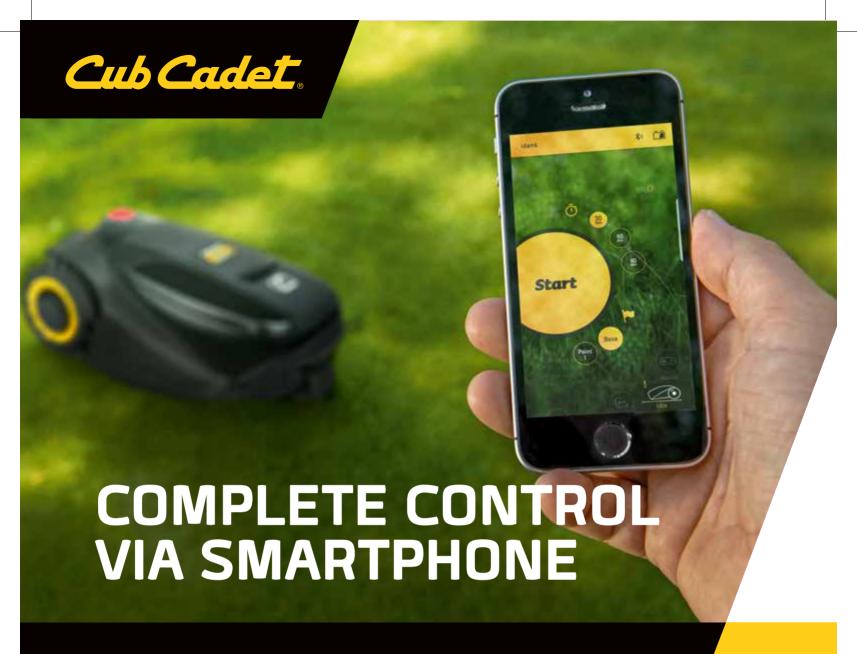

ALEXA-COMPATIBLE

Now your XR robotic mower does what you say. Because the 2019 models can be controlled with your voice via the cloud-based Amazon Alexa voice service. Mowing the lawn has never been easier!

ROBOCONNECT+

Included with the XR2 2000, XR3 4000 and XR3 5000 models. Unlike the standard RoboConnect module, a message is sent to your smartphone when the mower leaves a defined radius around your garden. MyXR also allows you to view the location of your XR robotic lawnmower at any time.

The App 2.0 allows the robotic mowers in the XR ENDURO SERIES to be controlled and programmed securely and conveniently using your smartphone. Simply download the app, install it on your phone and get mowing!

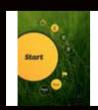

REMOTE CONTROL

XR mowers can be manually controlled, even beyond the perimeter wire. Perfect for narrow passages and small areas.

UPDATES*

- Mowing progress
- Battery charge
- Mowing times

PROGRAM SETTINGS

- Deploy the mower
- Return to base
- Deactivate automatic start
- Set mowing times

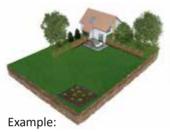

CUSTOMER SERVICES

- Immediate assistance
- Online diagnostics
- Online troubleshooting

THE RIGHT MOWER **FOR ANY LAWN**

No two gardens are alike. There could be one main lawn or several smaller turfs, or there might be additional zones away from the main area that need mowing. The Cub Cadet XR ENDURO SERIES models can handle all such lawns with ease. Thanks to the RoboZone sensor, you can mow separate zones without the need for a second base station. For more information, turn to page 92.

main zone only

Example: main zone, sub zone and separate zone

EASY TO INSTALL AND PROGRAM.

To ensure your XR robotic mower is installed and programmed properly, we offer a professional installation service via your specialist dealer. You can also set up the device yourself (an installation kit can be purchased separately).

STEP 1: DEFINE YOUR DESIRED MOWING ZONE To do this, you need to install the perimeter wire and fix it in place with pegs.

STEP 2: ENTER INDIVIDUAL DATA This will enable your XR robotic mower to work autonomously.

READY TO MOW! First, your XR robotic mower will mow along the perimeter wire and then return to the base. If there is enough capacity left, it will set off again and mow your lawn in a random pattern.

This video will show you more about how to install and set up your robotic mower.

EASY START

The new Cub Cadet XR1 500 robotic mower is ideal for anyone owning a smaller lawn of up to 500 m^2 and is looking for a compact yet high-performance mower. Driven by a 12V/8.8 Ah lithium-ion battery and a 100-watt engine, the optimized mowing and drive engines combined with the sure-grip spiked wheels achieve a high area performance. So only 3 hours of mowing are required per day for 500 m^2 of lawn. Which means the lawn is available to you 21 hours a day.

Cutting width:	18 cm
Cutting height:	15–45 mm
Area performance (max.):	500 m ²
Area performance (rec.):	400 m ²
Mowing time:	180 min

NEW

UNIQUE FEATURES OF THE NEW XR1 ENDURO SERIES

ROBOCONNECT

Allows the XR1 to be controlled and programmed via the Internet.

SPECIAL DESIGNED SPIKE WHEELS

The ridged special wheels impress with a strong grip. That provides better manoeuvrability, even on wet grass.

EXTERNAL CHARGING STATION

Place the base station near the edge of the lawn area to be mowed so that you can use the entire area as soon as your mowing robot is finished.

RELIABLE ENGINE

Extremely sturdy mower engine with powerful 100-watt output. You can look forward to a long service life and a minimum of maintenance.

ROBOHOME (INCL.)

A garage for your XR1 500: installed above the charging station, the device keeps the mower clean and protects it from rain and direct sunlight.

METAL SKI

Ski-type metal running surfaces deliver maximum manoeuvrability. That means easy mowing even in tight spaces.

FLOATING MULCHING DECK

This ensures the XR1 500 manages any terrain and mows with extreme precision.

12V/8,8 AH LI-IONEN BATTERY

The XR1 500 is powered by a modern lithium-ion battery and mows for 3 hours without recharging. This means you can spend more time on your lawn.

MULCHCLEANER

A proprietary solution from Cub Cadet, our unique patented mulch cleaner independently cleans the mowing deck. It automatically cleans the clippings out of the mowing deck while mowing, improving performance and reducing maintenance.

Cutting width:	28 cm
Cutting height:	15–60 mm
Area performance (max.):	1.000 m ²
Area performance (rec.):	500 m ²

UNIQUE FEATURES OF THE XR2 ENDURO SERIES

ROBOCONNECT

Allows you to access the MyRX online portal features. Our XR2 2000 model also comes with a GPS feature allowing it to be located when necessary.

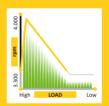

HIGH-PERFORMANCE ENGINE

200 Watt ensure top-level performance and extremely efficient mowing. The XR2 2000 even features a brushless and therefore practically wear-free, engine.

EXTERNAL CHARGING STATION

Unlike a conventional charging station, our charging station does not have to be directly on the lawn but can also be installed next to it.

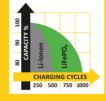

TURBO MODE

Turns on automatically the first time you use your mower to mow long grass faster and switches off instantly for shorter blades. Can also be set manually.

ROBOHOME (INCL. WITH XR2 2000)

A garage for your XR2: installed above the charging station, the device keeps the mower clean and protects it from rain and direct sunlight.

LONG BATTERY LIFE

With twice as many charging cycles as conventional Li-lon batteries, the LiFePO₄ high-capacity battery doubles battery life.

SPECIALLY DESIGNED SPIKED WHEELS

The ridged special wheels impress with a strong grip. That provides better manoeuvrability, even on wet grass.

MAXIMUM MANOEUVRABILITY

A single front wheel ensures top manoeuvrability, especially while mowing the edge of the lawn.

BLE (BLUETOOTH® LOW-ENERGY) REMOTE CONTROL

Allows the XR2 to be controlled conveniently from a distance* and is available as an accessory.

TEST VERDICT "GOOD"

The XR2 1500 was extensively tested by "Haus & Garten Test" magazine, receiving a rating of 1,5 (1 being the top mark and 5 the lowest mark).

XR3 3000

Cutting width:	56 cm
Cutting height:	20–80 mm
Area performance (max.):	3.000 m ²
Area performance (rec.):	1.600 m ²

UNIQUE FEATURES OF THE XR3 ENDURO SERIES

ROBOCONNECT

Allows you to access the MyRX online portal features. Our XR3 4000 and XR3 5000 models also come with a GPS feature allowing them to be located when necessary.

EXTREMELY POWERFUL BRUSHLESS ENGINE

2 x 200 Watt ensure outstanding mowing performance.

ROBOHOME (INCL. WITH XR3 5000)

A garage for your XR3: installed above the charging station, the device keeps the mower clean and protects it from rain and direct sunlight.

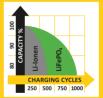

TURBO MODE

Turns on automatically the first time you use your mower to mow long grass faster and switches off instantly for shorter blades. Can also be set manually.

ROBOGRIPS

Improved traction and added grip on inclines and slippery surfaces.

LONG BATTERY LIFE

With twice as many charging cycles as conventional Li-Ion batteries, the LiFePO₄ high-capacity battery doubles battery life.

BLE (BLUETOOTH® LOW-ENERGY) REMOTE CONTROL

Allows the XR3 to be controlled conveniently from a distance*.

FLOATING MOWING DECK AND **MAXIMUM MANOEUVRABILITY**

Flawlessly handles even unusual terrain with incredible accuracy. The single front wheel ensures top manoeuvrability.

ONE BATTERY FOR ALL TOOLS

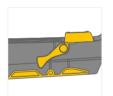

THE CUB CADET 80V BATTERY TECHNOLOGY

Cub Cadet 80V LI-ION DURA SYSTEM garden tools are specially developed to maximize your performance and endurance. They are extremely quiet and eco-friendly. No more concerns over emissions or cords. And minimal care and maintenance required.

ONE BATTERY FOR ALL TOOLS

Cub Cadet 80V POWER-PACK batteries fit in all 80V LI-ION DURA SYSTEM battery-powered tools – lawn trimmers, hedge trimmers, leaf blowers and mowers.

CLICK MECHANISM TO QUICKLY LOCK AND UNLOCK THE BATTERY

Simply plug it in, securely snap into place – done! Unlocking is just as easy: safely disengage the battery with no risk of dropping it and simply remove.

READY TO USE AFTER JUST 1 HOUR CHARGING

The 80V LI-ION POWER CHARGER charges batteries in just one hour – one of the fastest charging cycles on the market!

READY FOR USE IN SECONDS

Simply slot in, engage securely and you're ready to go!

INTEGRATED COOLING AND VENTILATION SYSTEM

Ensures safe charging and prevents battery overheating, which extends the battery service life.

108 / 80V LI-ION DURA SYSTEM

Cub Cadet

— Cub Cadet. — AXIAL FAN

The axial fan offers top efficiency in every stage as well as maximum air circulation through a vertical design.

80V LI-ION DURA SYSTEM LH3 EB

OUICKLY CLEAR AWAY DRY OR WET LEAVES

The power of the Cub Cadet 80V leaf blower leads the market for cordless tools. It is just as powerful as comparable gas devices – only with no emissions and less noise. And it will remove that autumn carpet of leaves at lightning speed.

— Cub Cadet. — SWIVEL-ACTION BLADE

The blades are adjustable in five positions: 90°/45°/0°/-45°/-90°. Keeping your hands in the ideal position at all times and avoiding entanglement in the branches.

80V LI-ION DURA SYSTEM LH3 EH

KEEP HEDGES IN SHAPE EFFORTLESSLY

The Cub Cadet 80V hedge trimmer adjusts flexibly to your hedge so you don't have to stretch.

Cub Cadet.

— Cub Cadet. — MULCH COVER

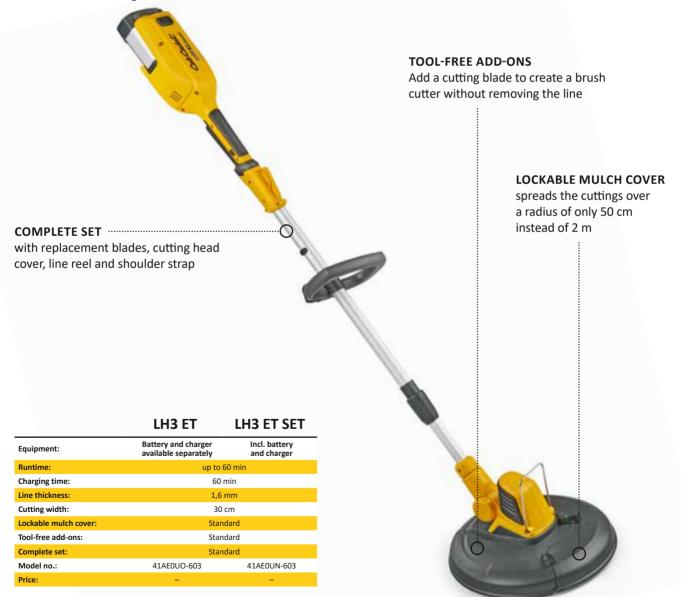

Thanks to the lockable mulch cover, the cuttings remain in a narrow 50 cm area instead of spreading across a 2-metre radius.

80V LI-ION DURA SYSTEM LH3 ET

TRIM AND CUT BACK BRUSH WITH EXTRA POWER

The ideal trimmer when you want to remove grass at lawn edges and even cut back long brush on inclines.

ACCESSORIES

ENDLESS POWER FOR MOWING AND MULCHING

You want the performance of a combustion engine without the noise and fumes? No problem for the two Cub Cadet 80V battery mowers! Thanks to exceptional compactness, they also reach tight corners and easily curve around obstacles. Truly proficient performance!

POWER DRIVE

Long-range mowing with the powerful, maintenance-free and brushless 80V engine.

BOOSTED AIRFLOW TECHNOLOGY

For optimal transport of the cuttings to the grass catcher.

3-IN-1 SYSTEM

Rear discharge, collection and mulching in a single tool – adjustable settings.

CLEAR LINES FOR A WELL-KEPT GARDEN

It's always the same story - over time, grass will grow over the lawn edges and paths in any garden. With the new Cub Cadet LC2 BP6 lawn edge cutter, you can remove that grass quickly and efficiently. The design allows you to guide the device precisely along the lawn edge, neatly clearing paths, flagstones and flowerbeds. And your garden looks perfect again.

STRONG ENOUGH TO CUT EVERYTHING

The Cub Cadet LC3 DP56 mobile lawn trimmer is so strong it meets any challenge – however tough the conditions. With the powerful Cub Cadet engine and ultra-large, 56-cm cutting width, trim long grass and weeds at a stroke, just as if mowing short grass.

SCARIFYING: THE BEAUTY TREATMENT FOR YOUR LAWN.

Scarifying is a key part of optimal lawn care. It helps fight the notorious thatch which forms on every lawn and blocks the supply of air, water and nutrients to the roots. Done properly, scarifying lets your lawn breathe again. The Cub Cadet scarifier XC1 applies the power you need to remove this thatch and let sunlight, air and water once again reach the soil and roots. The XC1 also features blades and springs. Allowing a combination of two functions in a single machine: aerating and scarifying.

BLADES AND SPRINGS

The XC1 models have 15 or rather 17 flail double blades and 14 or rather 16 double springs. This combination allows for two functions in one machine – for aerating and scarifying. If you would like to aerate the soil of your garden, use the higher position with a gentle touch of the blades and springs on the surface of the soil. If there is the need to scarify, set the position of the blades and springs to a 3 mm working depth.

REMOTE TRANSPORT POSITION

With the lever on the handle you can switch from transport to working position conveniently from behind the unit

WORKING DEPTH ADJUSTMENT

The working depth of the Cub Cadet scarifier XC1 can easily be changed centrally.

Working width:	35 cm

IMPORTANT LAWN CARE INFORMATION:

After scarifying your lawn, please don't forget to reseed blank spots and nourish it with fertilizer and water. Also, sufficient irrigation over a few weeks is crucial to the outcome.

GROUNDBREAKING IN EVERY SENSE OF THE WORD.

Thanks to the Cub Cadet garden tiller XC3, the strenuous and time-consuming task of digging and loosening the soil by spade is a thing of the past. Powerful and reliable, the tiller tackles any job; breaking up even the hardest of soil and facilitating seed preparation. It is ideal for areas of up to 1.000 m². Four self-sharpening, heat-treated, high-quality tine sets made of spring steel ensure excellent work results at a tilling width of 46 cm. The adjustable depth stake improves the machine stability and allows control of the working speed and tilling depth. The tiller has a forward and a reverse gear and a gear with a forward/backward rotation of the chopping blades.

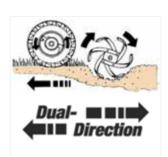

USER-FRIENDLY

Single-hand operation allows you to avoid footprints in areas already worked on.

FULL COVER

Fully covered tine set with 46 cm working width.

BIDIRECTIONAL TINE

The self-sharpening tines (330mm dia) rotate forward for milling and backward for deep digging. They produce a fine crumbled bed in any soil.

DEPTH STAKE

Fully adjustable depth stake.

Cub Cadet

EXTRA-WIDE

Extra-wide 46 cm tilling width gives you more tilling area per pass – helping you cover more ground at a time.

Working width 46 cm

RIGHT POWER FOR ANY SNOWFALL SITUATION

SNOW THROWERS

Whatever winter brings your way, throw it back with an X Series Snow Thrower. This powerful line of snow throwers has been built to quickly and easily clear extreme snow conditions with incredible control, maneuverability andstrength. With the already proven 1X and 2X models and the first-of-its kind 3X three-stage power, be sure to find exactly the snow removal power you need with the sought-after strength and quality.

Cub Cadet.

COMPACT DESIGN. SUPER-STRONG.

The 1X Series snow thrower delivers the quality and performance you expect in a compact and easy to use package. The ergonomic, adjustable handlebar with all control elements close to the gripper makes it particularly easy to clear smaller areas of snow quickly and comfortably. Thanks to the working light, you can even work well in twilight or in the dark.

221 LHP

Clearing width:	53 cm
Intake height:	33 cm
Engine:	Cub Cadet
Engine displacement:	208 cm ³
Rated power:	3,9 kW / 3.600 min ⁻¹
Drive:	Auger-assist
Model no.:	31AR2T6D603
Price:	_

AUGER SYSTEM

This specially designed auger system works like a paddle; shoveling the snow into the auger housing, then discarding it via the discharge chute. The auger is made of reinforced heavy duty rubber to avoid damaging the pavement.

1X SINGLE STAGE

For light snowfall

- Kind to the pavement
- Ideal for walkways and doorways

Cub Cadet

A SNOW THROWER WITH GREAT **POWER AND PERFORMANCE**

conditions. Cub Cadet OHV 4-stroke engines with electric start make it easier to start the snow thrower. The PowerSteering steering assistance and the heavy-duty steel auger allow you to perform your work even under the harshest conditions. The high, impact-resistant polymer discharging channel and the steel scraper make it particularly easy to work through heavy snow and ice. And you'll be back in the warm sooner.

Clearing width:	61 cm
Intake height:	53 cm
Engine:	Cub Cadet
Engine displacement:	208 cm ³
Rated power:	3,9 kW / 3.600 min ⁻¹
Drive:	6 forward/2 reverse
Model no.:	31AW53LR603
Price:	_

AUGER SYSTEM

Instead of two screw halves, the "Xtreme-Auger" has individual segments in X-form that are individually secured on the axle. Snow and ice are "chopped" up by the auger blades before being fed into the rotor, which discharges the snow through the chute. Advanced technology for better performance.

2X TWO-STAGE

For medium to heavy snowfall

• Ideal for wide walkways, parking areas, etc.

130 / SNOW THROWERS

X STANDS FOR EXTREME POWER

The 3X three-stage power is the flagship model in the Cub Cadet snow thrower line. It clears deep snowfall up to 50 % faster than a traditional Cub Cadet 2X snow thrower.

THE REVOLUTIONARY 3X SERIES WITH 3-STAGE TECHNOLOGY

SAVING

25%

MORE SNOW THROUGHPUT

30%

MUCH EASIER AND EFFORTLESS CONTROL

AUGER SYSTEM

Our innovative auger system bores itself into the snow with an accelerator screw located in the middle of the travel direction. This is supported by two lateral screw elements that guide the snow to the centre.

3X THREE-STAGE

For heavy to extreme snowfall
• Clears snow powerfully and efficiently

• Ideal for fast snow clearing of larger areas

Cub Cadet.

BALANCE SYSTEM (730 HD TDE)

- 1 Packed snow: Placed in this position, the snow thrower easily manoeuvres through hard packed snow and over icy snow surfaces.
- 2 Normal snow: This position allows the user to easily manoeuver the unit under normal snow conditions.
- **3 Gravel position:** In this position, snow can be cleared without gravel being picked up by the snow thrower.
- 4 Transport position: In this position the auger housing is lifted off the ground for easy moving without leaving any scratches on the pavement.

Cub Cadet. 1 SINGLE-STAGE

Cub Cadet.

2

TWO-STAGE

Cub Cadet.

3X

THREE-STAGE

STARTING HANDLE

The extra-large starter handle is just another well engineered detail which makes the difference in this premium snow thrower.

COOL BLUE SKID SHOES

The new COOL-BLUE skids made of special plastic largely prevent scratches and abrasions on floor slabs, etc. The distance between the housing and the ground can be steplessly adjusted on the skids.

CLUTCH LOCK

The clutch lock system keeps both the drive and auger clutches engaged one-handed. This lets you change the chute direction or ground speed during operation.

ERGO-HANDLE

Ergo-handle with full-length clutch lever allows for effortless operation.

X-TRAC TYRES

The tyres feature a special X-Trac tread, which allows for perfect grip in the snow. No snow chains required!

OHV WINTER ENGINES WITH LARGE FUEL TANKS

The Cub Cadet 4-cycle OHV winter engines offer improved starting and low emissions and are ideal for low temperatures. Generous displacement ensures sufficient power, even in the toughest conditions.

REMOTE CHUTE CONTROL

Throw the snow in your direction of choice. The discharging channel is operated easily from the handlebar.

HEATED HAND GRIPS

Keep your hands warm to finish the job in comfort! The handles stay warm and you can keep working through the coldest weather.

ZERO TURNING CIRCLE STEERING SYSTEM

The snow thrower can be steered by simply actuating the steering levers left and right below the guide handles.

FRONT CUT MOWERS VS. CUB CADET ZERO-TURNS:

CUB CADET - BEST IN THEIR CLASS

Manufacturers of front cut mowers, i.e. lawn tractors with the mowing deck in front of the chassis, claim that their mowers are the most efficient on the market. We wondered: Is this really accurate? After all, it is generally known that Zero-Turn mowers offer more advantages in terms of efficiency – from the entry-level model to the top class. We wanted to find out exactly, so we carried out a detailed comparison in the mid-range mower price segment based on 6 rating categories. The result is clear – across the board, Cub Cadet Zero-Turn mowers are simply more efficient – even the entry-level models. Take a look for yourself!

Best results.

Maximum efficiency.

Solid construction.

THE FACTS SPEAK FOR THEMSELVES.

CUB CADET ZERO-TURNS CLEARLY BETTER!

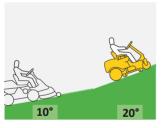

Want to know the details behind the points? We have illustrated the different categories below so you can judge for yourself.

AREA PERFORMANCE

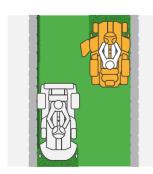

Cub Cadet Zero-Turns are 60 % faster than front cut mowers, which means they cover more area in less time. Even the Cub Cadet entry level models leave the front cut mower competition in the dust. The PRO models are up to 77 % faster than comparable front cut mowers, offering an even higher area performance.

MANOEUVRABILITY

Cub Cadet Zero-Turns can cope with slopes of up to 20° – that's double of what front cut mowers can handle. What's more, they can even mow along a slope and stay right on course. Plus, Cub Cadet Zero-Turns rotate on the spot instead of requiring a 70 cm radius. Zero-turn technology makes it possible.

EDGE CUT PERFORMANCE

Due to their design, front cut mowers always leave a narrow uncut stretch of lawn. This means there will always be a need for rework with a grass trimmer. Cub Cadet Zero-Turns mow the entire area.

COMFORT & HANDLING

With the Cub Cadet Zero-Turns, you can adjust the mowing deck from your seat instead of having to get off as is the case with front cut mowers. Cub Cadet Zero-Turns also provide excellent seating comfort. Even the entry-level models come with armrests, whereas only high-priced top front cut mowers feature these.

MAINTENANCE

Most front cut mowers have a complex control system based on Bowden cables, which have to be adjusted frequently. Cub Cadet Zero-Turns have a sturdy steering mechanism made of metal, which only requires a little lubrication every 25 hours of use.

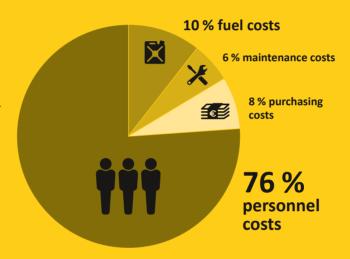

LAWN TRACTORS VS. CUB CADET ZERO-TURNS:

SAVE 50% MOWING TIME AND SERIOUS MONEY

Zero-Turn mowers are the most agile and high-performance lawnmowers on the market. They manage vast areas and are increasingly taking over from conventional lawn tractors in the commercial sector. The intensive cutting needs of commercial users means it pays to use a Zero-Turn and it really pays to use a model from the XZ ENDURO SERIES or PRO SERIES Cub Cadet line up.

PERSONNEL AND FUEL COSTS ACCOUNT FOR MOST OF THE OPERATING COSTS

Especially if you use your mower intensively, the purchase cost only has a small effect on overall costs. Take for instance a Zero-Turn for 6.000 € and a total service life of 1.500 hours. The operating costs amount to just 4 € per hour. At around 40 € per hour, personnel costs are 10 times as high.

MOW FASTER, EARN MORE

Due to their fast working speed, Cub Cadet Zero-Turn mowers offer up to 50 % more area performance than lawn tractors or ride-on mowers. So, even though they are a little more expensive to buy – Zero-Turn mowers are better value for commercial users. This examples shows the savings:

Example:	Conventional lawn tractor	Zero-Turn mower
Area performance/h	approx. 5.000 m ² (depending on model even much less)	approx. 10.000 m ² (depending on model even much more)
Operating hours/year (at equal area performance)	200 h	100 h
Purchasing costs/h*	3€	4€
Maintenance costs/h	3€	3€
Fuel costs/h	5,50€	5,50€
Personnel costs/h	40€	40€
Total costs/year	10.300€	5.250€

ENDURO SERIES™ PRO SERIES

MOW LIKE A PRO – SAVE LIKE A PRO!

MASSIVE ADVANTAGES FOR YOU AND YOUR WORK:

+ More stability on slopes and inclines Easy handling thanks to steerable, driven front wheels

+ Safe driving, even on difficult terrain Double hydrostatic transmission provides flexibility and traction on all terrains

+ Maximum area performance with Zero-Turn technology

Negotiate obstacles with ease in a single steering operation

+ Optimal mowing result even on rough terrain Mowing deck always held steady between the axles without rocking or swinging

+ Lowest maintenance costs, long service life All components are easily accessible and benefit from a robust steel frame and low-wear mowing deck

+ Uninterrupted working Large fuel volume means fewer refuelling stops

+ Easy handling and ultimate comfort provides health benefits

Effortless, back-friendly working thanks to outstanding ergonomics and comfort seats

+ Suitable for every application Grass collection system available as an accessory

- + Designed to meet the toughest demands Extremely powerful engine
- + Large range of working widths for efficient mowing Models available in widths of 107 to 183 cm – the right solution for every application

+ No learning process

The steering wheel is just like a car steering wheel

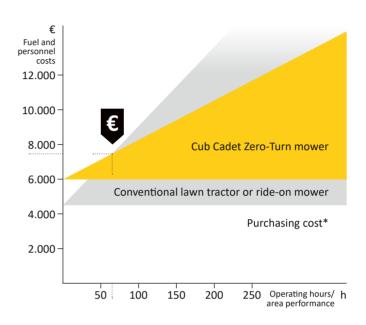

+ Extra versatility

Can also be used as a tractor unit; some models even suitable for winter work

*Based on purchase costs: $4.500 \in$ for conventional lawn tractors, $6.000 \in$ for Zero-Turn mowers and total operating time of $1.500 \,h$.

REACH THE PROFIT ZONE FASTER

Thanks to faster mowing, Cub Cadet Zero-Turn mowers pay off quickly. That's because the low fuel and personnel costs soon make up for the higher purchase price.

SAVE UP TO 25% FUEL WITH EFI ENGINE

The XZ2 107i, XZ2 117i models are the first to feature a twin-cylinder engine with direct fuel injection developed by our own experts. The high-performance engine is incredibly efficient and does away with a manual choke for easy start-

ing and you benefit from much better driving characteristics and lower emissions. Maintenance costs are also extremely low. The two PRO Series models Z1 122 and Z1 137 have a KOHLER EFI engine, which offers you the same advantages.

MULCHING AND DISCHARGING INSTEAD OF COLLECTING SAVES YOU EVEN MORE TIME AND MONEY

Cub Cadet Zero-Turn mowers come without grass catchers. Instead, they mulch the grass cuttings during mowing and discharge them. You benefit in several ways:

+ Better lawn quality A constant supply of nutrients for the lawn.

+ Less working time and lower fuel costs No need to collect or remove cuttings, no unnecessary trips for disposal. That saves time and money.

And if you want to collect the cuttings, you can order an optional grass catcher with a volume of 200 l or 300 l.

Cutting width:	107 cm

PRECISE PERFORMANCE WITH LAP BAR TECHNOLOGY

Built strong with heavy-duty components and high-performance commercial-grade engines, the XZ Series delivers dependability and the professional results you and your customers demand.

DURABILITY

With a reinforced steel frame and chassis and a heavy-duty fabricated front axle, the XZ1 Series shines for its strength in particular.

EASY ENTRY

Deep frame for easy entry on your Cub Cadet XZ1.

LEVER WITH SOFT GRIP

Soft grip features make the work easier and more comfortable.

COMFORT SEAT WITH ARMRESTS

Ideal for comfortable, fatigue-free working (XZ1 127 and XZ1 137).

LEGROOM

Generous legroom plus a low seat position make for fatigue-free working.

POWERFUL MOWING DECK

The heavy-duty mowing deck has been designed for long-term use. The cutting pattern was improved by increasing blade overlap. Available for the XZ Series.

STRENGTH, EASE AND VERSATILITY.

Feature for feature, the XZ2 gives you more. Zero-Turn handling combined with the ease of steering-wheel control and fourwheel steering makes for unmatched stability and unprecedented versatility. An unbeatable combination, with undeniably excellent performance. Plus incredible durability to last for many years to come.

COMFORTABLE SEAT

The seat and backrest upholstery is specially designed for comfortable, fatigue-free working, even for extended periods.

ADJUSTABLE STEERING COLUMN

All XZ2 are equiped with a quick adjustable steering column to perfectly suite all operator heights and needs.

ELECTRIC START BUTTON

A convenient and reliable way to start your engine of the models XZ2 107i and XZ2 117i.

CUB CADET V-TWIN EFI ENGINE

For the first time, the XZ2 107i and XZ2 117i models feature an engine we manufactured in house. The twocylinder drive comes with exceptional performance and efficiency. Saving gasoline and keeping maintenance costs low.

SYNCHRO STEER® TECHNOLOGY

UNBEATABLE MANEUVERABILITY AND UNMATCHED CLIMBING ABILITY

The Cub Cadet Synchro Steer® Technology is the next step of the evolution of the Zero-Turn technique. Our unique Zero-Turn riders with a traditional steering wheel provide you with the amazing maneuverability of a conventional Zero-Turn but retaining full control of the front wheels. Steering and drive are perfectly synchronized to ensure the exact speed and rotation direction of each rear wheel, whatever the position ofthe front wheels. This revolutionary technology is available for the XZ Series.

ENDURO SERIES'

ZERO TURNING CIRCLE — GREAT VARIETY.

High-performance meets practicality for one strong rider. The industry's first zero-turn system with steering wheel control and four-wheel steering for unmatched strength and stability. From the power of a professional-grade engine to its unbeatable efficiency and durability, every mow is as strong as the last.

ADJUSTABLE STEERING COLUMN

The XZ3 is equipped with an adjustable steering column so you can set your own comfy seating position.

COMFORTABLE SEAT WITH ARMRESTS

An adjustable high-back seat with armrests makes hard work far more comfortable.

PNEUMATIC CASTER WHEELS

Controllable pneumatic front caster wheels which support the Zero-Turn of your XZ3.

ROUNDED MOWING DECK SENSING ROLLERS

Prevent damage to the turf when cornering in tight bends.

STEERING WHEEL

A soft grip steering wheel for best control, however tough the conditions.

LARGE SIDE EJECTION DEFLECTOR

Large side-ejection deflector helps spread the cuttings over a large area.

BERND K.

TOP PERFORMANCE AND EFFICIENCY

Cub Cadet.

PRO SERIES

"ESPECIALLY IN TIGHT SPACES AND AROUND TREES, I NEED TO BE ABLE TO STEER EXTREMELY PRECISELY."

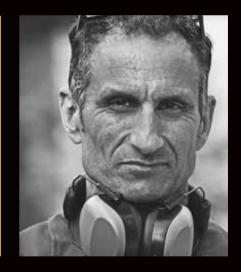

MARTIN U.

THE PROOF IS IN THE PRO TEST.

For our PRO Z line, we did more than just make a few updates. We made our strongest, most efficient line of mowers yet. This isn't something we take lightly – it's something real landscape professionals have affirmed. In fact, we gave the PRO Z Series to 100 landscapers nationwide and asked each of them to put it to the test for 16 weeks. After thousands of hours on the job, they provided honest feedback that helped us tailor the final design. The result is a line of commercial Zero-Turn mowers that provide record levels of performance, comfort and durability. Just ask the pros.

"FOR ME, A LARGE CUTTING WIDTH
IS ESSENTIAL. IT JUST MEANS
I MANAGE A LARGER AREA IN
LESS TIME."

MIRCO B. SAXONY

"NOW MY STAFF FINISH THEIR WORK 20 % FASTER. SO THE NEW FLAGSHIP MODEL PAYS OFF QUICKLY."

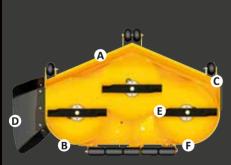

LUIS M.
BADEN-WUERTTEMBERG

DURABILITY - HEAVIEST DUTY.

From the frame to the front yoke, every part of the PRO Z is designed to handle serious rigors. The thickness of the cutting deck establishes a new industry standard, while an all-around heavy-duty construction ensures this zero-turn will last for the long haul.

THE THICKEST, STRONGEST STEEL DECK IN THE INDUSTRY

Tackle the toughest conditions with the industry's only triple-7-gauge steel cutting deck: a 7-gauge deck shell with 7-gauge top and bottom reinforcements.

DURABILITY

- A 1/4" leading rolled edge
- **B** 5/16" steel side reinforcements
- C 3/4" wear guard

QUALITY CUT

- **D** Flexible rubber discharge chute
- E High-lift Marbain® blades (with blade tip speed up to 18.500 fpm)
- F Adjustable rear stripping roller

BEEFED-UP FRONT END

Absorb the impact of rough terrain with a new front-end construction featuring a best-in-class combination of axle, hub and yoke size.

- A 2" x 3" pivoting front axle
- **B** Isolation damping system
- C 5" steel hubs
- **D** 1/2" thick steel front yokes

COMFORT — WORK HARD. RIDE EASY.

The PRO Z can take a beating, but your body shouldn't. Enjoy a smoother ride all day long with the enhanced comfort features of the PRO Z Series.

PRO Z AIR-RIDE SEAT

Our exclusive air-ride seat allows riders to adjust the seat firmness to their personal preference.

- A Isolation damping system under the seat (PRO Z 5/7)
- **B** Lumbar support
- **C** EVC cushion (elastic vibration control)
- **D** Angle adjustment
- E Padded armrests

PIVOTING FRONT AXLE

A pivoting front axle allows the front end of the PRO Z to negotiate unseen terrain while protecting the quality of the cut. The frame and axle float as the PRO Z moves, allowing the deck to follow the terrain profile and avoid scalping.

CUB CADET: BUILT IN AMERICA SINCE 1961

Cub Cadet products are thoughtfully designed around people who depend on us – at home, on the job or in the elements. And we're proud to say we've built them in America since 1961. Today, we're building our products and strengthening workforces and local communities in Ohio, Kentucky, Tennessee and Mississippi. Each of our nationwide manufacturing plants is synonymous with the spirit of Cub Cadet: hard work, commitment and a passion for quality. So you can be sure your Cub Cadet PRO Z product was designed and built with American ingenuity.

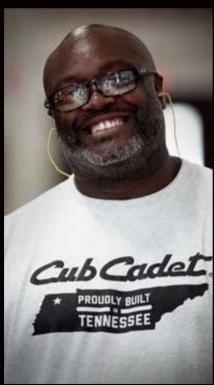

BUILT USING THE HIGHEST QUALITY COMPONENTS SOURCED LOCALLY AND GLOBALLY.

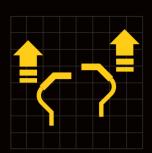

KOHLER CONFIDANT EFI EZT 740

Z1 122

Thanks to its Kohler EFI engine, the new entry model in the PRO SERIES is both a powerhouse and an ultra-economical device. Achieving fuel consumption up to 25 % lower than that of engines with comparable performance. Saving both time and money, because the Z1 122 needs far less fuel and less frequent refueling. The extremely durable welded mowing deck with a cutting width of 122 cm helps you achieve pro-level cutting performance.

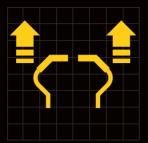

PRECISE PERFORMANCE WITH LAP BAR TECHNOLOGY

The two steering levers of the Z1 122 with floor-length comfort handles and integrated fixing brake optimize your comfort and steering precision for perfect results, however confined the space.

TURNING TO THE LEFT:

To turn to the left, move the left drive control lever to the rear of the right lever.

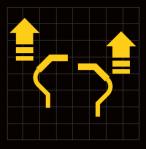

the neutral position to stop the

DRIVING FORWARD:

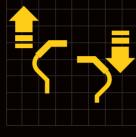

EXECUTING A ZERO-TURN: To execute a zero-turn, move one control lever forward while simultaneously moving the other control lever back.

Slowly and evenly move both drive control levers forward. The mower will then start advancing. To slow down the tractor move the control levers to the rear to attain the desired speed or move the levers to

TURNING TO THE RIGHT:

To turn to the right, move the right drive control lever to the rear of the left lever. The greater the distance between the two levers, the more sharply the mower turns.

DRIVING REVERSE:

To drive the mower in reverse, slowly and evenly move both drive control levers to the rear.

KOHLER CONFIDANT EFI EZT 745

Z1 137

The new Zero-Turn Z1 137 exceeds your expectations, not your budget. Equipped with a powerful cutting deck, it always delivers professional-quality results. Its outstanding speed, efficiency and comfort impress anybody who works daily with this Zero-Turn mower.

A POWER MACHINE

With its fast speed of 15 km/h, the Z1 137 is at least twice as fast as a normal lawn tractor, excelling in efficiency

B MORE COMFORTABLE THAN EVER

High-comfort seat, suspension and non-slip controls guarantee safe and fatigue-free work

C MARKET-LEADING EFFICIENCY

25 % less fuel consumption with electronic fuel injection (EFI)

D STRONG AND ROBUST

Welded mowing deck with 137 cm cutting width for endless power

E EXTREMELY AGILE

The unique 360° turning circle technology helps you negotiate tight corners and obstacles easily
